DETAILED ACTION

Claim Rejections - 35 USC § 101

1. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

2. Claims 27 and 39 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

Claims 27 and 39 are directed to data stored on recording medium. Since the data does not provide any functional relationship to the medium by control the medium to access the data on the medium or impart to any structural hardware and software component to provide certain function processed by a computer the data on the information recording medium does not make it statutory. See MPEP 2100.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 27,37-38 and 42 are rejected under 35 U.S.C. 102(e) as being anticipated by Horoshima et al (5,801,781) .

Regarding claims 27 and 37-38 and 42 , Hiroshima discloses an apparatus (Figs. 5-7, column 6) for recording and reproducing information on and from a recording medium bit stream information forming objects which includes at least first data unit, at least a second data unit having at least one first data units, a third data unit having at least one second data units, the third unit having a header that comprises time information (SCR) relating to the first unit (column 6, lines 50-60, column 8, line 60-65, column 13, lines 60-65).

Regarding claim 42, Hiroshima further teaches that the bit stream is a transport stream

5. Claims 27 and 39-41 are rejected under 35 U.S.C. 102(e) as being anticipated by Miwa.

Regarding claims 27 and 39-41, Miwa teaches a method of recording a stream data of objects on a recording medium (Figs. 6,7 and 14), the data of the objects are formed by first data units , second data units and third data units . The second data unit has one or more the first data units, the third data unit has one or more the second data units and a management having information of a number of first data unit and time information relating to the first unit (figs. 6,7 and 14) . Miwa further teaches a recording and reproducing apparatus (Fig. 22) for recording and reproducing the data on and from the medium

Claim Rejections - 35 USC § 103

Art Unit: 2615

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 42 and 43 are rejected under 35 U.S.C. 103(a) as being unpatentable over Miwa in view of Yanagihara et al (6,211,800).

Regarding claims 42 and 43, Miwa fails to specifically teach that the bit stream is a transport stream. However it is noted that forming a transport stream from a MPEG stream is well known in the art as taught by Yanagihara. Therefore, it would have been obvious to one of ordinary skill in the art to modify Miwa with Yanagihara by using the teaching as taught by Yanagihara for forming the stream of Miwa into a transport stream.

Response to Arguments

7. Applicant's arguments with respect to claims have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Kim teaches an apparatus for recording transport stream.

9. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

Art Unit: 2615

§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
